

***The Phia Group, LLC Announces The Release of its New
"Phia Document Management" (PDM) Software***

October 1, 2014; Braintree, MA

A first of its kind plan document drafting solution, Phia Document Management (PDM) was created to satisfy the needs of the entire health plan industry. PDM allows for instant population of an online template featuring The Phia Group's critically acclaimed plan language, while still ensuring customization to meet each client's unique needs.

For years, The Phia Group's clients have asked them to not only draft plan documents, but also review and revise documents prepared by others; including vendors' online templates and in-house efforts. The intent of such secondary review has always been to ensure that these plan documents are not only compliant, but forward thinking in areas of cost containment and the defense of plan rights.

"Missing from the market was software that encompasses the three C's: Compliance, Cost Containment and Customization," said The Phia Group's CEO, Adam V. Russo, "Our goal was to deliver a powerful and intuitive solution for plan document creation and management." "Options presently available to the health plan industry either promote a detail oriented customized approach, or a quick and easy mass production approach..." remarked Jennifer McCormick, Vice President of Consulting, "... but until now, nothing offered a balance of the two."

"Phia Document Management is a SaaS (Software as a Service) product," Michael Branco, The Phia Group's co-founder and Principal said, "as a SaaS commodity, no additional hardware is necessary to access PDM; all you need is the internet."

For more information regarding PDM and The Phia Group's other innovative offerings, please contact the PDM Project Manager, Toussaint Anderson III, by email at tanderson@phiagroup.com or by phone at 781-535-5662.
